Objective

I am a computer science graduate with a strong desire and ability to continuously learn and improve by working on my strengths and addressing my weaknesses. I have experience in React and solid knowledge of Angular, Node.js, and MySQL. Primarily, I am seeking a role where I can learn and contribute to new and innovative projects in the web development field, enhancing my skills over time and delivering value to your company.

I am a highly motivated React/Next.js/TypeScript Developer with a passion for building high-performance web applications. My experience includes developing complex full-stack solutions using React, Next.js, Node.js, and MongoDB. I have knowledge of Server-Side Rendering (SSR), Static Site Generation (SSG), Client-Side Rendering (CSR), and Content Delivery Networks (CDN). Additionally, I have knowledge of CI/CD practices, which I am eager to leverage in a dynamic and forward-thinking environment.

Education

Palestine Polytechnic University

BA Computer Science

2018 - 2022

Experience

A trainee at one of Gaza Sky Geeks' training (React Training - Gaza Sky Geeks)

Sept - Dec 2022

- I worked in a team, which improved my teamwork and social skills.
- I learned many important principles and concepts: JSX, hooks, service, routing, and context at React, which I used to build many projects.

Full stack developer in educational center

Jan - April 2024

- Developed a full-stack website for education centers using React, Node.js, and MongoDB.
- The website provides features for managers to manage courses, students, teachers, enrollments, and financial details, including operational costs and profit tables. Also there is admin how will own many centers so he had his pages which manage the managers and provide to him details about the managers and reports.
- Gained expertise in creating backend APIs, connecting them to databases, integrating them with the frontend, and hosting the website on Hostinger.
